the unwonted inaction of the past two days, the editor's thoughts) arrived to his work, and he began to rousider life make-up of the number now in preservious. "I'm not quite satisfied make-up of the number now in preservious." I'm not quite satisfied make-up of the number now in preservious. "I'm not quite satisfied heavy for May there ought to be more of the light end life and hiosomicated his a little heavy for May there ought to be more of the light end spring story in him."

The "Postelles," a new department of the magazine, were short sketches, with hardly plot enough to be called sorties; sometimes a light character rudy—a delinate word painting of some aspect of nature.

He has given that same May number much previous consideration, but as yet has been unable to get the issue into the shope which he wiskes it. Fred Asheroft has the reputation of being a careful editur, one who studies the drivands of the public, and the Naw-a-Days Magazine has the reputation of being the best un the narket for that very reason. It is always timely, and that is what attracts the public. It never prints a christmas story in duly, but its contents are always appropriated to the second. It is for that very reason that Frel Asherott is giving it his attention today. The number that is just ready for the press larks o timely story that it should have, one that savors of the spring flowers and kladred topics. So as the driving sone heats against his window the editor is thinking of the flowers of May time story.

Mr. Abhorot took an art colendar from the wall by his side and turued the leaves until the came to the May page. The picture was an excellent copy of a water color painting. It represented an orthand of apple tress, covered with their yink and white bloom. Ayoung girl stood under one of the irree, lead been suspended foe four months. s now said to be very much alive and to se again at the head of the relsel (2) orders. Nevertheless Deneral 1910 still sends his periodical reports that the in-surrection has been suppressed. Apropos of the word, "rebel," It has been often misapplied to patriots and heroes., It is also from the side one considers it that the difference appears. The members of the Boston Tea Party were rebels without any question, but they were and are even yet considered by some to have been patrious and heroes.

Perhaps the light of future history will so soften the shades of these poor infi-guined Filiphos, who are so foodish as not to want finde Sam to rule them, that the mark the same property is some they may be then rememb sweeter name than,—rebel.
